

# JADE ENGINEERING

Our focus is not to simply provide you with a competitive quote. Our reputation is built on the fact that we will first learn about your business and listen to your specific needs first.

Communication is key at Jade. We keep in regular contact with all our clients during and after a project to ensure the objectives of that project are being met.

On initial consultation for any size of project, you will be assigned an appropriately skilled contact within our company who will meet with you so we can provide an official quotation.

All job related issues are kept transparent through regular contact.
